SPRING COMMENCEMENT / MAY 18, 2016

Congratulations on your graduation from the University of Maryland! This is a milestone that should bring great pride to you, your family and friends.

I am certain that your time at the University of Maryland has been filled with fearless ideas, friendships and opportunities. As president of this great university, I want to express my hope that you have explored new areas and discovered new talents.

The world is waiting for you to share them.

As you move beyond the campus, I hope you will remember the intellectual curiosity and drive that inspired your time here. Graduating does not mean that learning has come to an end. It means that you are now equipped to take charge of your own learning. This is a privilege and a profound responsibility. Society's advancement will depend upon your knowledge and your leadership.

As you leave us, you should take with you the pride we all feel in your accomplishments as scholars, artists, athletes and leaders. You have enriched the university's life and have helped it to climb to a new level of distinction. We welcome you into the alumni family, a truly special group.

I hope that you stay connected to the University of Maryland and take full advantage of being an alum. Stay involved with us and help new generations of students develop their futures. You can do this by returning to campus often, starting with Maryland Day 2017, on April 29.

You have my very best wishes for all your future plans. Make your mark. But wherever your future path takes you, please remember that you will always be a TERP. I hope you will always stay in touch. Go Terps!

Sincerely,

Wallace D. Loh, *President*

On behalf of the University of Maryland Alumni Association, congratulations on your milestone achievement!

Today you become members of a distinguished group: University of Maryland alumni. Like you, we all exhibited discipline, commitment, determination and leadership in our academic studies, as well as in our campus and community activities. After departing College Park and applying these qualities in other aspects of our lives, we saw doors open wide to opportunities once unimaginable. You too will carry these qualities, and we trust they will lead to great accomplishments and success.

Now it's time for you to focus on your future. And as you do, we ask that while on your journey, you take the time to look back upon this great alma mater and reflect on the value of your experiences, many of which were made possible only through Maryland alumni contributing time, money and talent. Be encouraged! You too will one day leave your own legacy and make a contribution that will enhance the experiences of those who follow. The single first step in making such a lasting contribution is joining the Alumni Association.

While this phase of your life is concluding, your relationship with the University of Maryland continues. The Alumni Association can help you stay in touch with friends you made on campus, prepare you for career and networking opportunities, keep you informed about alumni and university news, and more.

It is our hope that as an alumnus you will display your degree proudly and continue the tradition of demonstrating to the world the high-quality education it represents. In turn, Maryland will continue to educate the country's brightest students, pursue cutting-edge research, encourage innovation and entrepreneurship, explore the arts and defend our athletic titles. Maryland will continue to be fearless in everything it does and will always make you proud to be a Terp!

Stay active. Stay informed. Stay connected. Stay fearless.

Sincerely and with gratitude,

A stylized, handwritten signature in black ink, which appears to read "Wanda A. Alexander". The signature is fluid and cursive.

Speaker Biographies

RACHEL GEORGE
STUDENT SPEAKER

Rachel George wasn't going to let all the opportunities at the University of Maryland pass her by. She grabbed hold, shooting photos for *The Diamondback*, working as creative director for a student startup and studying abroad in China even as she pursued degrees in marketing and English.

She also learned the value of stepping away from the academic rat race during an immersive trip to rural Ecuador in 2015 as part of the Maryland Social Entrepreneur Corps, for which she helped run health campaigns and consulting projects. Now, George wants to use her media skills to help tell stories and further social justice.

"It was good to see exactly how much you don't need—to see what is necessary and not necessary," she says. "It was a re-centering."

That thoughtfulness would not surprise any member of the university community who has met George. Professors and advisers praise her as conscientious, diligent and empathetic.

"She's smart and clever, yes. But she also knows how to work hard. Industry and genius: an unbeatable combination," says

English Professor Michael Olmert. "She is going to make the whole University of Maryland very proud of her someday. I already am."

As part of the QUEST Honors Program, George nurtured an entrepreneurial spirit. She was the chair and lead designer for QUEST's marketing team and, for her capstone, worked as a student consultant for Unilever. George was also a Strategic Design and Innovation Fellow in the Robert H. Smith School of Business.

"I love that community of people who are constantly pushing each other," she says. "It makes you wonder what you can do differently."

Although George has no definite plans after graduation beyond pursuing documentary and visual design work, she says such uncertainty is exhilarating rather than frightening. For their part, her mentors have no doubt of her success.

"The world will be a better place because Rachel is part of it," says Kylie Goodell King, QUEST's director. "The University of Maryland already is."

IOWIS ZHU
UNIVERSITY MEDALIST

Iowis Zhu is leaving the University of Maryland with a double degree in biochemistry and biological sciences, aspirations of becoming a leader in medical research, and the accolades of the campus' scientific community.

He is, quite simply, a "force of nature," says Associate Professor Jason D. Kahn, who supervised Zhu in his Department of Chemistry and Biochemistry lab.

"Iowis is an intellectual powerhouse," Kahn says. "He gets more done than any other student I've ever met, and he is a team player and leader who improves the performance of all those around him."

Zhu came to College Park from Howard County with a Banneker/Key scholarship, the most prestigious one that UMD awards to incoming students, and branched into all areas of scientific research, interning at the National Institute of Allergy and Infectious Diseases, volunteering at Howard County General Hospital and serving as an undergraduate teaching assistant. A student in the Honors College's Integrated Life Sciences Program, he won a renowned Goldwater Scholarship and was inducted into the national leadership honor society Omicron Delta Kappa.

But he is most proud of creating and leading the UMD International Genetically Engineered Machine (iGEM) team, which competes internationally on synthetic biology

projects and promotes undergraduate science, technology, engineering and math (STEM) research. Zhu led 25 researchers, organized conferences and even helped fundraise, as the team won two gold medals at the iGEM Global Jamboree.

"I was able to learn a lot through firsthand experience—how to be a good leader, how to solve conflicts, how to allocate resources to achieve our long-term goals," he says. "It's great fun, too."

Zhu also studied abroad in India and Japan, observing how communities around the world address health challenges. Donna Howard, an associate professor in the Department of Behavioral and Community Health, taught Zhu during a course in India and was struck by not only his intelligence, but also his character.

"He has a quiet and mature demeanor but a passion and determination that are striking and truly inspirational," she says. "His sincerity and warmth are wonderful attributes that complement the seriousness with which he pursues an understanding of the social sciences, biologic systems and clinical care."

Zhu plans to pursue a combined M.D./Ph.D. degree at a university in the San Francisco Bay area so he can continue to research in the lab and bring innovations to patients.

"You have to be able to connect your work with what's going on in the real world," he says.

KEVIN PLANK '96
COMMENCEMENT SPEAKER

Kevin Plank's journey to the top of the sports apparel world began in the summer heat at the University of Maryland. As special teams captain for the Terp football squad, Plank led his teammates through two-a-day workouts and got tired of changing his sweat-soaked cotton T-shirts over and over.

He wanted something better—something cooler, drier and lighter.

So Plank, who graduated with a bachelor's degree in business administration, started looking for the perfect fabric and fit, searching from stores in Maryland to the Garment District in New York City. After finding the right blend, he created a prototype and launched Under Armour—the high-performance answer to the sweat-drenched cotton dilemma—from his grandmother's basement.

In the past 20 years, he's gone from selling his products out of his car trunk to running a global supplier of athletic apparel, footwear and equipment. As Founder and CEO, Plank oversees 12,000 employees worldwide with annual sales of nearly \$4 billion in 2015.

Plank and Under Armour strive to continually innovate, from compression clothes that help muscles recover to running shoes that measure the distance of a run workout untethered. The company's Connected Fitness platform also powers the world's largest digital health and fitness community through a suite of applications: UA Record, MapMyFitness, Endomondo and MyFitnessPal.

He has also empowered others to follow his entrepreneurial path. Plank is an active supporter of the Robert H. Smith School of Business and the Dingman Center for Entrepreneurship. A member of the university's board of trustees, Plank played a critical role in developing the Dingman Center's endowment fund, which invests in startup businesses. In 2006, he launched the Cupid's Cup Entrepreneurship Competition, named after the Valentine's Day rose business that Plank created as an undergrad. This year, the national contest awarded \$100,000 in prizes to promising young entrepreneurs.

Driven by another of his passions, horse racing, Plank purchased historic Sagamore Farm in 2007 with a long-term plan to restore the facility and bring the tradition and legacy of winning thoroughbred racing back to Maryland for good.

Plank's commitment to the local community is reflected in Under Armour's Give Back initiatives and his personal work with local organizations. Besides UMD, he sits on the board of trustees for Start Up America, the National Football Foundation, John Hopkins Medicine and the Greater Baltimore Committee. Plank is also leading efforts to redevelop more than 260 acres in South Baltimore into a premier waterfront destination with a new Under Armour campus.

Plank lives in Baltimore County with his family.

THE ALUMNI HALL OF FAME

The Alumni Association's Hall of Fame recognizes university graduates who have brought honor to their alma mater through distinguished careers in a variety of disciplines. The Hall of Fame induction ceremony takes place once every five years, with the last group of honorees being inducted in June 2015. GOLDEN TERPS

The Maryland Alumni Association created the Emeritus Alumni Society, or Golden Terps, to recognize University of Maryland, College Park alumni who are 50 or more years beyond graduation. A new class is inducted every spring, and they are included in the commencement ceremony. The Class of 1966, proudly adorned with their Emeritus Alumni Society medallions, black-trimmed gold robes and gold mortarboards, will follow the student marshals in the processional.

Doctoral Degrees

The doctoral degree is the most advanced earned degree conferred by American institutions. There are two distinct types: the practitioner's degree and the research degree. The first type represents advanced training for the practice of various professions, principally doctor of audiology, doctor of medicine, juris doctor, doctor of pharmacy and doctor of veterinary medicine. These degrees do not involve the completion of original research by the student. The University of Maryland, at the professional school in Baltimore, awarded the first two dental degrees on March 9, 1841.

Master's Degrees

The master's degree is an academic honor bestowed upon students who have successfully completed work beyond the baccalaureate. A thesis and an oral examination are usually required. In 1920, the University of Maryland awarded its first Master of Arts and Master of Science degrees in fields other than agriculture.

Bachelor's Degrees

The bachelor's degree represents the completion of a four-year course of college-level study and is the oldest academic degree awarded by American institutions of higher learning. Maryland Agricultural College, which later became the University of Maryland, College Park, awarded its first Bachelor of Arts and Bachelor of Science degrees in 1862.

Note: Latin Honors published in the commencement program are tentative and unofficial, pending the submission and calculation of all final grades for the semester of commencement.

Special Recognition

SENIOR MARSHALS

The Senior Marshal Program began in 1991 as an opportunity to acknowledge outstanding seniors at their commencement. The students selected to be marshals were nominated by faculty, administration and staff for their outstanding accomplishments and contributions to the University of Maryland. We are proud to recognize these truly remarkable students.

An extra special thanks go to the Office of the Registrar and the Graduate School.

A heartfelt thanks go to the many volunteers who assist with the campus-wide and individual college and school ceremonies. These efforts are greatly appreciated.

The May 2016 class roster comprises degree candidates from the graduate and undergraduate programs at the University of Maryland, College Park. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative. The university reserves the right to withdraw or add names. Diplomas (for other than doctoral degrees) will be mailed by the Office of the Registrar.
